

K & N REPLACEMENTS AIR FILTERS

For Street Legal Motorcycles - Are designed to fit right into the standard OEM airbox. No modifications are required by the owner, no jet changes or adjustment of the carburetors is anticipated or suggested. Customer modification of the standard airbox - removing the cover, drilling holes into the side or top will have a drastic effect on smooth carburetion. Modifications will cause the stock system to run lean and reduce horsepower. Keep your motorcycle stock and the new K&N Replacement Element will be good for the life of the engine.

For Off-Road Dirt Bikes and ATV's - Are ideal for extended use in dirty and dusty off-road riding and provide clean carburetion even at high altitude. As a rule, no jet changes are required with just a K&N filter element, however the spark plug condition should be checked for proper mixture after the first few miles of riding. If the airbox has been modified for increased air flow, the main jet size will need to be increased to provide the proper fuel mixture.

EMGO REPLACEMENT AIR FILTER

Emgo Air Filters meet or exceed OEM quality. All air filters are individually boxed with complete up-to-date application information printed on each box

UNI FILTER REPLACEMENT AIR FILTERS

For Street Legal Motorcycles - Are a direct factory replacement filter and are designed to fit perfectly into your stock airbox.

For Off-Road Dirt Bikes and ATV's - With "Ultra Seal" to keep out all the dirt, dust and mud providing superior engine protection. Unique two filter in one design for easier oiling and cleaning.

The use of custom air filter requires removal of air box
