

### Twin Air Filter

The air filter on your motorcycle or ATV is the only protection your bike has from the elements. Make sure your motorcycle or ATV is protected with the Twin Air dual-stage off-road air filter. The Twin Air dual-stage off-road air filter traps even the smallest particles without restricting air flow to offer the best power output without harming the engine.

Twin Air filters are designed to increase airflow while ensuring the highest level of protection from dirt/dust.

With fused layers of patented open-pore foam and fine inner foam the Twin Air dual-stage off-road air filter protects from dust, dirt, and sand. The coarse outer Shell catches airborne dirt, grime and sand while the fine inner layer traps the little stuff. The special adhesives used in the construction of the Twin Air dual-stage off-road air filter will withstand repeated cleaning even with harsh solvents.

1. Coarse open-pore foam catches airborne dirt, grime and sand.
2. Fine open-pore inner foam acts as a second filter to trap the smallest particles while ensuring maximum air passage.
3. Exclusively formulated adhesive ensures glue seams will not break down.
4. Thick, flat foam, greaseless sealing ring ensures maximum contact with your airbox, while acting as a breathable gasket for increased air passage.
5. Fused outer and inner elements prevent dirt and grime from being lodged between layers. Trapped particles can restrict airflow and if dirt works it's way into your engine, a pinhead-sized granule will gouge your small cylinder, piston and rings like a bullet.

### Twin Air Backfire Replacement Filter

Special backfire resistant layer of foam laminated to inside of filter.

### Twin Air Airbox Cover

The Airbox Cover prevents water and cleansers from entering your intake when cleaning the airbox.

- Manufactured from tough, durable ABS plastic.
- Rubber sealing ring is provided to insure a perfect, leak-free fit.
- To use, simply remove your air filter from the airbox and install the Airbox Cover with the provided mounting screw.

### Twin Air Oil Filters

Twin Air set the standard with the Dual Stage Air Filter and their oil filters are built with the same racing expertise.

Twin Air uses the highest quality paper mesh in their oil filters.

The high quality mesh combined with Twin Air's production technologies refine their ability to build consistent top quality oil filters.

The Twin Air oil filter is designed to replicate the size and shape of your OEM oil filter to make a simple swap.
