

BRIDGESTONE BATTLEAX RADIAL TIRES

BRIDGESTONE

BATTLEAX

Mono-Spiral Belt

The Battlax BT016 & BT021 tires have been manufactured using the latest Bridgestone Battlax Technology.

- MSB construction means that a continuous single strand is wrapped around the circumference of the tire.
- This one-piece construction eliminates overlapping of belts, seams and joints. An MSB tire is lighter than conventional multi-cross belt construction, it has more stability since it minimizes heat generation inside the tire and gives high shock absorption.

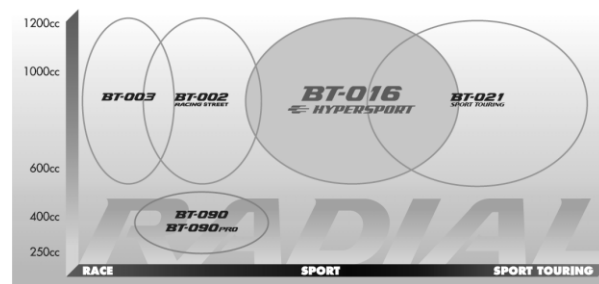

Dual Aligned Compound (D.A.C.)

With the new technology called D.A.C., Bridgestone can control the alignment of molecules in a single sheet of rubber. Now, one tread rubber can have different characteristics.

The center area of tread rubber has strong wear resistance against acceleration and braking while the shoulder area gives strong cornering performance. The new Battlax radials are the first Bridgestone motorcycle tires with D.A.C. Technology. The fact that D.A.C. uses only one tread rubber, guarantees constant performance throughout tire life.

BRIDGESTONE BATTLEAX LINE UP

BATTLEAX HIGH PERFORMANCE SPORT RADIALS

Battlax BT-002 Racing Street

A MotoGP-inspired Hypersport Tire for Street Superbikes. The BT-002 Racing Street provides legendary front end contact feel and cornering performance proven by Bridgestone in MotoGP.

A hypersport tire designed to provide best performance on the road for pure sport riding.

- NEW !!! Battlax BT-002 Racing Street DOT Approved Hypersport Street/Track Day tire
- Ideal for performance riders and track days
- Developed using latest technology derived from Bridgestone's MotoGP tire development
- Front tire features Dual Tread Construction. Medium compound in the center and high grip soft compound in the shoulder
- HTSPC-MSB (High Tensile Super Penetrated Cord – Mono Spiral Belt) technology in front and rear tire improves stability and reduces heat generation
- Compares to the Dunlop Sportmax GP, Michelin Pilot Power, Pirelli Diablo Corsa, Metzeler Racetec

BATTLAX HIGH PERFORMANCE SPORT RADIALS

Battlax BT-016 Hypersport - Ultra-High Performance Sport Radials

The BT-016 was designed to maximize the performance of sport bikes on the road.

Technical Features:

Front

- 3LC (Dual Compound) provides grip performance in all riding modes. The center compound offers linear handling. The shoulder compound secures high grip and solid contact feel
- Parallel S-shaped grooves give optimal cornering force to improve stability, linear handling and bump absorption
- Groove location across tread center provides rich contact feel and stable wet performance.

Rear

- 5LC (Triple Compound) offers ideal grip performance in all riding modes. The center compound provides good stability. The shoulder compound transfers engine power to the road with strong traction. The edge compound offers strong side grip and solid contact feel at deep lean angles.
- L-shaped grooves enhance bump absorption and rear-end steering
- Grooves do not cross tread center area providing both wet performance and strong traction. High speed durability is maximized

BT-014 Ultra-High Performance Street Radials

- Ultra-High Performance Radial utilizing a new compound developed by technology from MotoGP tire development
- Front: narrow construction for light handling, better feedback & improved stability
- Rear: Cap base construction with new bead construction, steel mono-spiral belt technology and silica rich compound to offer high speed stability and superior grip.
- Innovative tread design to improve traction, wet performance and noise reduction.
- Compares to Dunlop Qualifier, Michelin Pilot Power, Pirelli Diablo, Metzeler Sportec M1

BATTLAX SPORT TOURING & CRUISER BIAS PLY

Battlax BT-45 Touring (H-Rated) Bias Ply

- D.T.C. - Dual Tread Construction - Gives prolonged/even wear rate.
- New Compound - With silica, allowing improved wet weather and cold temperature tire warm-up.
- New tread pattern - Computer designed tread for all seasons.
- Improved flexibility for better comfort and tire "footprint".
- H-Rated for a more comfortable ride.

BT45H Front

BT-45 H Rear

Battlax BT-45 Sport/Touring (V-Rated) Bias Ply

- D.T.C. - Dual Tread Compound
- Gives prolonged/even wear rate.
- New Compound - With silica, allowing improved wet weather, cold temperature tire warm up.
- Computer designed tread for all seasons. New Computer designed construction (CTDM)
- Improved flexibility for better comfort and tire "footprint".

SPITFIRE BIAS-PLY SPORT TOURING TIRES

S11 Front

S11 Rear

Spitfire S11 Sport / Touring (H-Rated)

- 4-ply casing, incorporating insert plies, a refined belt technology that keeps the tire round & cool, even at top speeds
- Zig-zag & angled outer grooves (front & rear) provide wet weather performance by throwing water to the sides, yet still resist rain-groove wander. Balanced wear characteristics maintain tire profile
- Available in black wall (BW), raised black lettering (RBL) or raised white lettering (RWL)

BATTLE WING OFF-ROAD/DUAL SPORT TIRES

Battle Wing BW501 Front & BW502 Rear Off-Road/Dual Sport Tire

80% ON / 20% OFF

The Bridgestone Battle Wing BW501/BW502 use a V-rated radial tire designed for Adventure Sport bike applications.

The BW501/BW502 combination is designed for **90% on-road/10% off-road** use.

- Front Tire BW501 features a high-grip compound and a new profile to enhance handling and contact feel.
- Rear Tire BW502 features a silica enriched compound offers an exceptional level of grip on both wet and dry surfaces.
- Mono-spiral belt construction offers high speed stability and extra shock absorption
- Tread pattern design minimizes road noise.

ED03

Gritty DOT Series (80% Off-Road - 20% On-Road)

- D.O.T. approved on/off road tire for the serious dual sport rider.
- F.I.M. approved tire for I.S.D.E. Competition.
- Heavy-duty reinforced construction for anti-puncture and cut resistance.
- Good shock absorption for increased off-road traction.

* ED03/04 Combo is primarily focused on street performance

* ED660/661 Combo is a DOT/FIM approved tire specifically designed for intermediate to hard conditions

* ED663/668 Combo is a DOT/FIM approved tire specifically designed for intermediate to soft conditions

Dirt

M203 & M204

Intermediate Terrain

- Derived from top MX/SX racing technologies, the new M404 and M403 cover a wide range of soils as well as ultimate performance on medium-hard terrain
- The front M403 provides advanced controllability and contact feel when turning into the clipping point
- The M404 gives more grip and traction, with improved slide control when exiting the corner
- With the improved performance, the M404 and the M403 ease you to turn the bike into the corner, and utilize the machine power to their maximum on acceleration and provide more grip and contact feel at your full lean
- Improved contact feel and gap absorption, better grip/traction/controllability and gives a wider range application to the harder side.
- The M404 is the replacement tire for the older M402 / and the M403 is the replacement tire for the older M401
- Designed for use with the M403 front tire

DUNLOP RADIAL TIRES

Sportmax Q2 Ultra High Performance Street Tire

- Intuitive Response Profile technology in the rear tire gives greater latitude in line choice while cornering and provides amazingly linear steering.
- Advanced Multi-Tread technology combines the benefits of a tough, long-wearing center compound for increased mileage with a special lateral-grip compound on each shoulder for superior cornering traction.
- Bigger footprint at extreme lean angles allowing greater lean angles and higher corner speeds.
- Newly designed continuous hex beads that are both lighter and stronger to enhance steering response in the front tire and increase cornering stability in both tires.
- Stiffer version of Dunlop's Jointless Band (JLB) construction in rear tire for reduced carcass distortion, that meet high-performance demands and provide a more consistent contact patch.

Sportmax Qualifier Ultra High Performance Street Tire

- Successor to the top-selling D208ZR sport radial, the Qualifier offers true race track-level grip and performance
- tire compound blends three race-developed polymers to maximize grip and warm-up quickly in the wet or the dry
- Front tire profile promotes quicker turn-in and lighter steering while also contributing to a larger footprint at maximum lean angles.
- Advanced belt design and JLB tire construction reduce unsprung weight for quicker acceleration and enhanced steering characteristics

Roadsmart Sport Touring

- The best wet-weather performance of any Dunlop road tire, with long-lasting mileage to match
- MT-Multi-Tread compound incorporates a long-wearing compound in the center of the tire tread and a lateral-grip compound on each shoulder to maximize cornering performance.
- Micro-sized carbon particles improve dry grip under acceleration, and wet grip is improved with a special silica additive
- Cosecant-curve tread design with deep and long grooves to evacuate the maximum amount of water in both straight-line and cornering conditions

Dunlop D493 Elite 3 Radial Touring/Custom

These radial touring tires deliver great mileage and handling for most big radial-shod touring motorcycles.

- Wear resistance is substantially improved with more even-wear characteristics providing increased mileage plus great traction.
- Tread pattern provides class-leading wet-pavement performance.
- Sport-derived profile provides a lively response in turn transitions and a solid feel through turns for confident cornering.

DUAL SPORT STREET TIRES

Speed Index H

Front

Dunlop D607 Dual-Sport Street (80% Street / 20% Dirt)

- Tread pattern features wide, stable, central blocks with large lateral grooves to provide superb water evacuation, and smaller longitudinal grooves to optimize block stiffness - increasing wear resistance.
- Features Dunlop's single-radius concept introduced on the D208ZR. This design reduces changes to the contact patch area at different lean angles for improved feel and progressive steering response.
- Front tire uses 2 different constructions: 90 series sizes use conventional cross-ply technology; 80 series tire uses Dunlop's aramid breaker tread reinforcement & radial casing technology to provide excellent steering response and cornering stability.
- Combines Jointless Band (JLB) construction with Dunlop CTCS for enhanced cornering and wear performance, excellent high-speed stability and exceptional tire compliance

DUNLOP GEOMAX MX51 - Intermediate Terrain MX Tire

The Geomax MX51 delivers enhanced grip, added durability and a wider range of terrain applications.

- New profile design with more tread volume (greater land/sea ratio) in the shoulders for excellent cornering grip and a more open center-tread area for straight-line grip.
- Recessed biting edges in shoulder tread blocks yield more traction.
- Tie-bar design connects and reinforces the tread blocks for greater tread stiffness, yielding improved intermediate - to - hard terrain performance.
- Recess design in the area between tread blocks gives the tire improved compliance for enhanced rider comfort.
- Enhanced land/sea ration and wider tread profile for improved traction.
- Larger-radius tread block base for strength and increased durability.
- Used by top pro riders in the 2008 Supercross and Motocross Nationals.
- Speed Index M

DUNLOP GEOMAX MX31 - Soft/Mud Terrain MX Tire

The Geomax MX31 carries a wealth of innovative features that allow the tire to dig down deep for extra traction in sand and mud.

- Features a new patented "chiseled" shoulder block shape. A taper in the block creates a smaller point on top that allows the knob to penetrate through the ground's soft surface layer and grab the firmer ground beneath. By burrowing into firmer substrate, the knobs gain traction instead of floating on the surface.
- Limited block surface creates a more open pattern for enhanced penetration in soft dirt/sand to contact harder ground for increased traction.
- Chiseled should block shape improves side traction and makes traversing ruts easier. This tapered shape facilitates knob penetration through soft surfaces, whereas a flat knob would "float" and/or be deflected. Instead, the tapered knob penetrates into the firmer underlying ground to give the tire more bite for more traction.
- Recess design in the area between tread block gives the tire improved compliance for enhanced rider comfort.
- Knobs are placed in a unique linked shoulder block design for better traction and grip in soft-to-intermediate riding conditions.
- Successor to the D773

MAXXIS PRESA DETOUR TIRES

Presa Detour MA-PD RADIAL TIRE

The New Presa Detour is a radial Adventure-Touring tire available for the V-Storm, BMW, and Triumph Tiger sizes. The Presa Detour offers excellent and responsive handling in both wet and dry, on and off-road conditions.

- Stable central blocks with large grooves for outstanding water dispersion
- Optimized tread pattern creates a larger contact patch for increased cornering confidence and smooth transition.
- Special formulated compounds yield low tread wear while offering outstanding traction.
- H Rated
- Tubeless

TUBLISS RIM LOCK

NEW!

Tubliss Rim Lock

- Tubliss® is a full circumference pneumatic rim lock which secures the entire tire bead to the rim, completely eliminating the use of a conventional tube
- Tubliss® completely replaces the conventional tube while delivering several key performance features - that's scoring points and lap times with racers and riders everywhere
- BENEFITS:
 - * Virtually flat
 - * Runs Cooler
 - * Quicker acceleration
 - * Reduces unsprung weight
 - * No pinched tube
 - * Secures tire bead

DESCRIPTION	PART #

TIRE REPAIR KITS

Plug & Pump Kit

160-1062

- No need to dismantle from rim.
- Features the Engine-Air System that needs no replacement parts.

Kit contains:

- Engine air Tire Pump 48" (107cm) Hose
- Engine air Fresh Air Valve & Adapters 18mm, 14mm, 12mm, 10mm
- Tube of Rubber Cement, .41 fl.oz.
- Compact Vinyl Pouch
- Thumb Buffer / Insertion Tool
- Four 2" long (50.8mm) Round "On the Wheel" Temporary Insertion Strips & full instructions.

Deluxe Tube & Tubeless Repair Kit

160-1035

Kit Contains:

- Two 9 1/2" (240mm) Steel Tire Levers
- Engine air Tire Pump 48" (107cm) Hose
- Engine air Fresh Air Valve & Adapters 18mm, 14mm, 12mm, 10mm
- Buffer/Stitcher Tool / Tube of Rubber Cement .41 fl.oz.
- Valve Cap with Core Remover / Reamer/Probe Tool
- Hand Cleaner & Paper Towel
- Three 1 1/4"(31.75mm) Round Patches , Two— 2"(50.8mm) Round Patches
- One 1 5/8 x 3"(41.28x76.2mm) Oblong Patch
- Three 2" long(50.8mm) Round "On the Wheel" Insertion Strips
- Three Permanent Repair Plugs 1 3/4" (38.1mm).
- Round Patch Head with a 1/4"(6.35mm) Rubber Sealing Stem.
- Heavy Duty Black Vinyl Zippered Pouch, Full Instructions.

Tubeless Tire Repair Kits

160-360

- Contains: 1 reamer
- 4 rubber sticks
- 2 tubes cement

Cold Patch Repair Kit

160-305

- For repairing tubes or other rubber goods, no heat or flame required.

Replacement Plugs

160-360-1

- For 160-360 Above
- Plugs only - 5 per package

Mini Tire Repair Kit

160-361

- Contains: 1 reamer
- 3 rubber sticks
- 1 tube cement

The Choice of Champions!

- If you're looking for the same quality, strength and performance in alloy racing rims that the top factory teams rely on to survive rim-crunching Supercross triple jumps or the Launch Pad at Unadilla, then look no further. EXCEL Takasago Rims are The Choice of Champions.
- Just check the pits at Baja 1000, Paris-Dakar, or any world class MX or Supercross event and you'll see that all the top riders and teams rely on the legendary strength of EXCEL.
- **Rim Application:** if the application states 'Yes' under 'Need Nipple Set' a nipple set is required to lace up rim.

Otherwise use stock spokes and nipples.

- **New Excel Rims:** if under 'Need Spoke Set' it states 'Yes' then a 'Excel New Spoke Set #' is required to lace up rim. Otherwise you can use the stock spokes or upgrade to the new Excel spoke set listed.
- **New Rim #'s:** add one of the following colour to the blank space S=Silver, K=Black

ie: CR80 17x1.40 Silver rim-order EBS 400 and 181-0305 spoke set

TCI Rim # Colour (s)=Silver (G)=Gold (B)=Black
