

AAEN ATV PERFORMANCE PRODUCTS

Trail Torquer Pipes

Designed for heavy pulling and tight trails
 Produces 43 HP at 6250 RPM (5 HP over stock)
 Delivers awesome stump pulling bottom end torque

Top End Pipes for 400's

Bolt on a 25 % power increase!
 This pipe produces 48 HP at 6500 RPM (10 HP over stock).
 Delivers aggressive midrange acceleration and strong bottom end torque.

- Use with Aaen's aluminum silencer or forestry approved spark arrestor silencer and clutch kit.

dB Dawg Spark Arrestor

This Spark Arrestor was designed specifically to work with Ignition's dB Dawg to contain exhaust sparks.

- Contains any spark produced by your motorcycle
- Three sizes to fit 501-8001, 501-8002 and 501-8003
- Spark Arrestor can not be used as a stand alone product - designed to work in conjunction with its counterpart dB Dawg.

PART #DESCRIPTION

501-8001SA	Fits 501-8001 Exhaust outlets from 1.31" to 1.50"
501-8002SA	Fits 501-8002 Exhaust outlets from 1.50" to 1.75"
501-8003SA	Fits 501-8003 Exhaust outlets 1.75" to 2.00"

Dawg Leash

501-8020

The Dawg Leash is an adaptable solution to tether any parts of your motorcycle. The 10' cable comes complete with a bracket and mounting hardware.

Perfect for tethering a dB Dawg, or brake/shifter levers

IGNITION ICE TECH

Keep your cool!

Ice Tech is a complete line of heat seeking and destroying products that help keep your bike performing in extreme conditions!

Ignition Ice Tech Shock/Carb Cooling Kit

The Ignition aluminized heat barrier tube wraps the exhaust mid-pipe to prevent the exhaust from heating up the shock reservoir, carburetor and brake reservoir.

- 2 sizes fit all exhausts
- Provides a consistent and longer lasting suspension
- No more "shock fade" half way through a moto
- Aluminized heat barrier withstands temperatures up to 2000 F

PART #	DESCRIPTION
549-9047	2" diameter
549-9048	2 1/4" diameter

Ice Tech Gas Tank Cooling Kit 549-9045

The Ignition Gas Tank Cooling Kit shields the gas tank from the heat of the engine, keeping your gas as cool as possible, ultimately improving performance.

- Withstands temperatures up to 2000 F
- Optimal performance is obtained when used in conjunction with the Shock/Carb Cooling Kit.

Heat Shield 549-2014

Ceramic Heat Shield replaces stock heat shield on the inside of your side cover where the muffler is.

- Withstands extreme temperatures
- Adhesive material allows for quick custom installation
- 18" square

EXHAUST ACCESSORIES

Maier Heat Tile Kit

Feature an aluminized fiberglass insulating tape that has an adhesive on one side and aluminized fiberglass insulating tape on the other. Designed to protect your plastic side panels, engine air scoop, etc from exhaust pipe heat. Heat shield is capable of withstanding 400 F constant heat or 500 F intermittent heat.

FMF STREET/SPORT PIPES

** ORDERS FOR ALL OUT OF STOCK FMF ITEMS ARE SPECIAL ORDER ITEMS - NO RETURNS, ALL SALES FINAL*

Street/Sport FMF Apex Slip-On Muffler

FMF introduces their most advanced Slip-On muffler onto the market. The diamond shape of the Apex Race Exhaust System is form fitted to match perfectly with today's most advanced sport bikes, maximizing cornering clearance and handling performance. The outlet shape mirrors the system shape providing an extremely high exhaust flow rate, and a distinct sound that no other system can match.

- Constructed of aerospace quality stainless steel, carbon fiber, and titanium in several combinations.
- Muffler outlet shape mirrors canister shape for a great look while enabling a high outflow rate.
- Intergrated fit to maximize clearance at extreme lean angles.
- Available as a Carbon Fiber Muffler with Titanium End Cap or Titanium Muffler with Carbon Fiber Cap for most applications
- Dual mufflers are computer designed for truly impressive performance

Street/Sport FMF Apex Cylindrical Slip-on Muffler

- Constructed of aerospace quality stainless steel, carbon fiber, and titanium in several combinations.
- Muffler outlet shape mirrors canister shape for a great look while enabling a high outflow rate.
- Intergrated fit to maximize clearance at extreme lean angles.
- Available as a Carbon Fiber Muffler with Titanium End Cap or Titanium Muffler with Carbon Fiber Cap.

Street/Sport Powercore GP

FMF has a new series of exhaust designed for the Sportbike enthusiasts. Features include:

- 100% titanium construction
- Bold Moto GP styling
- Lighter weight than stock
- Slip-on design for easy installation
- Header pipe NOT included.

Street/Sport Powercore-S

- Quiet-Core inserts available for stock sound level with aftermarket performance and weight.
- Internal square core uses Hi-Flo technology.
- Substantial power gains over standard systems.
- 3-piece design for structural reliability and ease of mounting.
- FMF's exclusive cross weave, multi-element muffler packing provides longevity and maximum sound disbursement.
- Modular end cap allows for a quick repack for optimum performance.

FMF 4-STROKE SILENCERS/SPARK ARRESTORS

Factory 4.1 and Factory 4.1 Carbon Complete Exhaust System

The Factory 4.1 exhaust system with the Powerbomb header is FMF's premier exhaust system.

- The lightest full system available.
- Superior power and performance
- Improved horsepower throughout RPM range.
- Features exclusive proprietary Chamber Core and PowerBomb technology.
- Factory Forward Engineering centralizes mass, improves handling.
- Titanium or Carbon muffler with titanium endcaps, midpipe and PowerBomb header.
- Customize with performance tuning inserts and spark arrestor module.

FMF 4-STROKE SILENCERS/SPARK ARRESTORS

* ORDERS FOR ALL OUT OF STOCK FMF ITEMS ARE SPECIAL ORDER ITEMS - NO RETURNS, ALL SALES FINAL

Factory 4.1 Slip-on and Factory 4.1C Slip-On

- Titanium slip-on muffler with stainless steel midpipe.
- Boosts low-mid torque, broader powerband, more over-rev.
- Features an angle-cut canister for compactness and a new formed end cap that makes the muffler less susceptible to damage.
- Factory Forward Engineering centralizes mass, improves handling.
- Exclusive mounting design allows for easy servicing for re-packing.
- FMF Factory 4.1C Slip-on Carbon System is the lightest system on the market with improved overall power output.

Ti Powercore

The Ti Powercore is the best value in performance exhaust and is one of the best mufflers we have produced. With more power, lower center of gravity and titanium construction, we are bringing power, handling and style to the people. Now you can have Factory performance and looks for less.

- Value priced performance muffler with titanium construction
- Removable spark arrestor included
- Available in natural or blue anodized finish

Speed

The Speed is the perfect track pipe for those wanting to shed weight and get more power at a reasonable price. The Speed is constructed from the very best American materials including lightweight titanium for the canister, a solid machined billet fixed mount, durable stainless steel end caps, and a mandrel bent midpipe.

- Lightweight performance exhaust with titanium construction
- Removable spark arrestor included
- Easily serviced for repacking

Powercore 4

The Powercore 4 is the original race design muffler. Aluminum construction and stainless steel Hi-Flo endcaps make for the perfect balance of performance and strength. FMF developed the PowerCore4 to increase the horsepower and torque throughout the entire power curve and give you a noticeable power increase.

- Space Age internal packing for maximum packing life.
- Hi-Flo modular end cap.
- Internal shape of core uses Hi-Flo technology.
- Enhanced sonic evacuation provides for higher flow and increased power.

Q4

The Q4 employs intricate chambers, baffles and proprietary multistage packing material making it the best performing quiet muffler available. With the Q4 you don't need to hear the power, just feel the power!

- Developed over years of championship off-road racing
- Max Sound output 96dB; most models below 93dB
- Constructed from aircraft grade aluminum and high strength stainless steel
- Use with stock or FMF header

Q4 Ti

The best way to describe the Ti Q4 would be "less is more" - less weight, less noise, more places to ride. The Ti Q4 weighs less than most moto mufflers and measures below 93dB on nearly all models tested.

- American TiMetal canister and end caps
- Max sound output 96dB; most models below 93dB
- Comes standard with spark arrestor
- Easily serviced for repacking

Titanium 4

The Titanium 4 racing exhaust system will give the ATV rider the huge weight savings of titanium with an overall horsepower and torque gain. All mufflers are available in a natural titanium finish or in a blue anodized finish. FMF's Titanium 4 is fully tunable with modular end caps that allow for easy changes to shape the powerband of the machine and alter the sound level.

Titanium 4 mufflers must be combined with a FMF mid-pipe

FMF Powerline ATV Muffler/Spark Arrestor

The Powerline mufflers is a must have bolt-on for any utility or Side-By-Side. The Powerline is developed for those who push the limits in the most demanding conditions as it is a completely mechanical design built from durable high strength stainless steel.

- Mechanical design, no packing to blow out
- Performance gains throughout RPM range
- Stainless steel construction will never melt through

FMF 4-STROKE HEADERS

MegaBomb Header

Bolt on a Megabomb for as much as a 3hp boost, plus the Megabomb actually reduces noises levels by as much as 1.5dB. Used by Factory Teams, the Megabomb is the next level technology you can have today.

- Produces long header torque and short header over-rev
- Reduces sound output as much as 1.5dB
- Increases output from stock motor as much as 3hp
- Made from premium American TiMetal material

PowerBomb Header

The redesigned PowerBomb is a four-stroke header that incorporates FMF's patented PowerBomb module at a precise location in the initial stage of the header. By positioning this "Bomb" at a key point in the system, increased performance and flow is achieved through the expansion and contraction of exhaust sonics through the system. Result is a flow increase of nearly 10%! The outer chamber in the Powerbomb allows the air to expand, cool and ramp back up at a higher velocity. Additionally, the PowerBomb is a "pre-muffler" of sorts which helps to lower the bikes sound output by providing more sound absorbing surface area for the sound medium (exhaust gases). On some models, you can choose between a moto or supercross version. The supercross version is designed for more low to mid-range power where the moto version is focused in the mid to upper RPM range.

Hi-Flo Header

The Hi-Flo was designed to enhance the overall power of your machine making it the perfect choice for upgrading your stock system. FMF Hi-Flo headers are available in both single and dual port systems providing excellent weight savings combined with improved performance characteristics that help make every four stroke rip.

FMF 2-STROKE SILENCERS/SPARK ARRESTORS

Q Stealth

High performance and quiet are forefront in a new 2-stroke version of the 4-stroke Q series. Q Stealth utilizes advanced sound technology to produce more off-road opportunities

- Quiet on the trail as well as on the sound meter
- No power loss
- More packing volume-longer time between repacks

FMF 2-STROKE SILENCERS/SPARK ARRESTORS

* ORDERS FOR ALL OUT OF STOCK FMF ITEMS ARE SPECIAL ORDER ITEMS - NO RETURNS, ALL SALES FINAL

Powercore 2

The Powercore 2 is the measure which others aim for. With its lightweight extruded aluminum oval canister mated to a perforated core, this silencer is above the competition. The Powercore 2 silencer provides a strong performance edge for any 2-stroke machine and the performance flow end cap and front stinger are stainless steel for unbeatable durability and an unmatched look.

Powercore 2 Shorty

Taking the proven success of the Powercore 2, FMF created the Powercore 2 Shorty, with a shorter inner core length and aluminum canister. This design results in a finely tuned bolt on performance silencer that maximizes bottom and mid rpm power. An excellent choice for tight tracks and supercross track applications.

Titanium 2 & SST Titanium 2

The Titanium 2 is FMF's premiere racing silencer. The Titanium 2 is built with a titanium performance flow end cap and titanium stinger to maximize overall weight savings. Combined with an anodized Shorty canister, the Titanium 2 delivers the power characteristics demanded by top riders. Completely rebuildable, the Titanium 2 silencer is the lightest silencer FMF has ever made.

Turbinecore 2 & SST Turbine

The Turbinecore 2 uses the exclusive "Turbine Dampening System". The straight through design of the spark arrestor canister and the performance flow stainless steel end cap ensures strength, durability and most importantly, track and trail proven unrestricted power.

The "Q" Powercore

The Q is the quietest 2-stroke performance spark arrestor made! Serious sound deadening qualities and excellent power. With its longer oval canister, the trademarked Q uses internal technology that retains optimum flow characteristics while enhancing sound absorption qualities.

Powercore

The original Powercore is a lightweight and compact silencer constructed of an extruded aluminum canister with nickel plated stinger and end cap. It is fully re-buildable using basic hand tools. It offers that factory look and sound while giving you an increase in power over the stock silencer.

Turbinecore

Compact in size and lightweight, the Turbinecore spark arrestor system uses the exclusive "Turbine Dampening System" making it a U.S. Forest approved silencer. Now older machines can be U.S. Forest legal with an updated factory look and sound. Re-packing is made easy as there are no rivets to drill out.

FMF 2-STROKE PIPES

SST Pipe

The SST pipe increases mid range pull and extends the over-rev considerably while sharpening the off idle throttle response. No other pipe on the market can offer these same type of gains or offer the same linear power delivery that the patented SST brings to the table.

- FMF Racing's Tru-Flo stamping process ensures a perfect fit and optimum performance.
- Chrome plated for everlasting appearance and durability.
- SST Module is the brain behind this pipe. Includes o-rings

FMF 2-STROKE PIPES

* ORDERS FOR ALL OUT OF STOCK FMF ITEMS ARE SPECIAL ORDER ITEMS - NO RETURNS, ALL SALES FINAL

Fatty Pipe

The Fatty Gold Series pipe broadens the powerband and provides a healthy power increase everywhere. Improved throttle response, a linear powerband and enhanced over-rev all add up to a pipe that everyone will benefit from. The Fatty pipe is the most popular pipe for that same reason.

Factory Fatty Pipe

The Factory Fatty has the same shaped cone sections as the popular Fatty pipe, but offers some new features. The Factory Fatty is constructed with two different thicknesses of US steel. FMF uses 19 gauge steel for the header portion for optimum strength and durability, and uses thinner 20 gauge steel for the body and rear cone section for increased weight savings. The thinner steel also yields a slight increase in power when compared to thicker materials (up to 1/2 hp) due to more efficient wave resonance. During construction the seams are all hand pounded after the stamping process to give it a smoother transition between sections and that factory look. Last but not least, this pipe does not have the Gold Series nickel or chrome finish that FMF has been synonymous for. This pipe comes with a raw, un-plated, oiled finish. The Factory Fatty has a tremendous amount of attention to detail.

Gnarly Pipe

The FMF Gnarly pipe focuses on increasing the lower RPM horsepower and torque to get you out of the toughest terrain. When looking to add 4-stroke tractor like torque to your 2-stroke and you need a pipe to withstand the harsh elements, this is the pipe for you.

- Nickel plating is an FMF trademark and has been 'copied' by everyone making it the most imitated expansion chamber in the world.
- Super strong 18 gauge steel construction makes it GNARLY

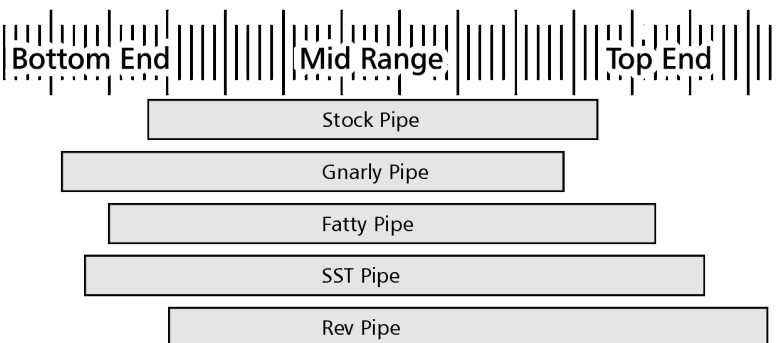

Rev Pipe

The FMF Rev Pipe has been computer designed to provide substantial mid to top end power gains. This specialized pipe performs great on fast tracks for riders who crave additional mid range and a higher RPM power.

- The FMF Rev Pipe is a must have for 125 and under riders that thrive on trackable power delivery and improved peak performance output.
