

STEAHLY FLYWHEEL WEIGHTS

- STEAHLIY flywheel weights let you go faster for longer with a smoother power delivery, better traction, and reduced stalling.
- Adding a flywheel weight will increase the rotating mass, or inertia of the motor, the result is an engine that is a little slower to rev, has more **controllable power** delivery and less hard hitting power, a more usable low to mid-range and is less likely to stall at low speeds
- You will feel **better traction** when it is slippery or hard pack, a torquier and broader power band and the top end power on many bikes will be improved with less tendency to lose RPM's when climbing or hitting obstacles.
- **STEAHLIY** weights are easy to **bolt on**, no welding needed! Weights can also easily be removed so you can change the power delivery back to stock for different riding conditions.
- Generally for a **fast aggressive rider** or for faster terrain a light to medium flywheel weight would be the best choice. For a **slower** more **casual** rider or for riding slower technical terrain a heavier weight is ideal.

BOYesen QUICKSHOT 2 ACCELERATOR PUMP COVER

QuickShot 2 Accelerator Pump Cover

The QS2 accelerates fuel delivery while eliminating troublesome trapped air that can cause bog and hesitation. Provides 25% more fuel capacity plus added bleed capability allows for solid fuel delivery 100% of the time. No modification required - simple bolt-on.

- Superior to stock accelerator pump covers
- 25% more fuel capacity
- High volume check valve
- Stops hesitation and bog
- Accelerates fuel delivery
- Instant response to throttle movements
- Improved low end performance
- Reduced hot engine stalling

BOYESEN WATER PUMP COVERS AND IMPELLER KITS

SuperCooler Water Pump Covers and Impeller Kits

The Boyesen SuperCooler Water Pump Cover and Impeller Kit increases coolant flow at all RPM ranges to keep your engine cooler and make more power.

- Patented Nautilus style impeller for 40% more hydrodynamic efficiency
- 2-piece cast aluminum construction makes it lighter and more tolerant during manufacturing

Hy-Flo Water Pump Cover

Designed by Boyesen Engineering to increase water flow and reduce hydraulic friction for a cooler, more constant temperature.

- Less horsepower loss during the late stages of a race
- Water pump covers feature a super tough, powder-coated finish that resists weathering and wear & tear

Water Pump Impeller

Designed by Boyesen Engineering to increase water flow and reduce hydraulic friction for a cooler, more constant temperature

- Less horsepower loss during the late stages of a race
- Impellers are designed to minimize cavitation

BOYESSEN IGNITION COVERS

Boyesen Factory Ignition Covers

Stock plastic ignition covers warp due to high heat and pressure from mounting screws. This allows water and dirt to enter your starter assembly causing corrosion of the ignition and premature wear of the crank seals. Boyesen Factory Ignition covers are cast in aluminum and powder coated for performance and protection and are guaranteed not to warp. The replacement Ignition cover gasket includes one nitrile bound gasket.

EBC CLUTCH KITS

Race/Sport SRC Kevlar Series

- A Kevlar paper lined plate set complete with heavy duty springs. The SRC kit is ideal for heavy sport bikes, faster riders, and production based race use.
- Advantages of the SRC Kevlar series are longer life and high heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series

EBC

Full Kit - DRC Series

The US #1 selling off road clutch

DIRT/ATV

Why are these the best?

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snap
- Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevent premature driven plate wear, oil muddying and loss and loss of stack height.
- EBC DRC kits are built with swagged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

Race - Heavy Duty 'EP' Kevlar Series

DIRT/ATV

- The EP kit is lined with Kevlar impregnated facings which incorporates an extra drive and driven plate in the set.
- Like the DRC Kit the EP kit includes steel driven plates to prevent premature wear and HD springs but has the added advantage of almost unlimited wear life.
- As with all paper clutches, the EP kit does take up faster on release than the DRC kit.
- Main advantage of the Kevlar lining is almost total resistance to burning and clutch abuse.

OIL FILTER

- Modern synthetic filter media, designed for ultimate flow with less pressure drop, yet engineered for outstanding filtration to meet or exceed all OEM specifications. Compatible with all of the latest synthetic engine oils and unaffected by racing fuels.
- All K&N 'spin-on' oil filters feature a heavy -duty metal can with a 17mm nut affixed onto the end that allows for easy installation and removal. The 17mm nut is crossed-drilled so racers can safety wire the filter to their bike.
- Includes a new high-quality rubber anti drain back valve
- An improved pressure relief valve
- A strong inner core
- A heavy-duty base plate with an improved rolled seal

Designed and Manufactured from the Finest Filter Paper

- Filter material is a composite of paper pulp, other fibers and resins which are processed to produce extra thickness and density to provide a High Filtration Yield.
- Filter material is fluted to it's maximum or to the required OEM numbers. The more fluting in the filter, the higher the filtration efficiency
- Oil filters designed from the finest filter paper that traps even the smallest particles, each filter comes complete with a sealing ring where necessary.
- Spin on filters are now available for all the very latest models.

Fram Exceeds Expectations

Fram has been around longer than most folks have been riding. Fram filters have a filtration rating of 10 microns so they really filter out the crud that can damage a motor. Fram filters help extend the life of a bike's high temperature, high RPM engine, a fact we'll use in future advertising. Use of Fram filters does not void the bike manufacturer's warranty.

Over 125 First Place Wins!

Team Suzuki Endurance has believed in and used Emgo oil filters from day one. You can also depend on Emgo to deliver top-quality filtration. Emgo oil filters are sold at leading motorcycle shops worldwide.

Emgo's new **MicroGlass** Oil Filter stops almost 100% of the harmful particles inside your engine. Regular filter media traps particles over 20 microns in size. Our new synthetic **MicroGlass** media traps particles over 10 microns in size **DEAD IN THEIR TRACKS**. While offering superior filtration and oil flow our dyno testing has shown a horsepower gain.

- Available to fit a wide variety of applications including Harley-Davidson, Arctic Cat, Honda, Kawasaki, Polaris, Suzuki & Yamaha
