## EBC CLUTCH KITS

### Race/Sport SRC Kevlar Series

- A Kevlar paper lined plate set complete with heavy duty springs. The SRC kit is ideal for heavy sport bikes, faster riders, and production based race use.
- Advantages of the SRC Kevlar series are longer life and high heat resistance, although this clutch has a more aggressive/faster take up than the CK cork series

# EBC

### Full Kit - DRC Series

*The US #1 selling off road clutch*

### DIRT/ATV

#### Why are these the best?

- Anti-swell, alloy impregnated heavy duty cork based facings provide smooth clutch take up and allow modulation, unlike paper clutches which tend to snap
- Complete engine set of friction plates, HD springs and STEEL SEPARATOR PLATES prevent premature driven plate wear, oil muddying and loss and loss of stack height.
- EBC DRC kits are built with swagged aluminum carriers which spread the load on the clutch basket and prevent clutch basket "dogging".

### Race - Heavy Duty 'EP' Kevlar Series

### DIRT/ATV

- The EP kit is lined with Kevlar impregnated facings which incorporates an extra drive and driven plate in the set.
- Like the DRC Kit the EP kit includes steel driven plates to prevent premature wear and HD springs but has the added advantage of almost unlimited wear life.
- As with all paper clutches, the EP kit does take up faster on release than the DRC kit.
- Main advantage of the Kevlar lining is almost total resistance to burning and clutch abuse.
