Definition of Handlebar Dimensions

- Rise - measured from bar's lowest surface to top side of the end of bar in normal riding position
- Pullback - measured from front side of bar to rear-most end of bars, in formal riding position
- Center Width - the total flat surface of the bar's center

CUSTOM CLASSIC BARS

Our Custom Classic Line of 7/8" handlebars is the best available. Each bar is professionally designed, contoured by craftsmen and then chrome plated to the most exacting specifications.

MX GRIPS TRIPLE DENSITY

PRO GRIP #788 Triple Density Extra Slim

- Firm on the inside, gel density towards the palm of your hand and medium density on the ends
- An even stronger inner sleeve to help minimize grip movement, while providing both a soft gel material and a harder material where needed.

Red/Grey	Blue/Grey	Green/Grey	Orange/Grey	Dark Grey/Grey
709-7074	709-7075	709-7076	709-7077	709-7078

PRO GRIP #791 Triple Density

- Firm on the inside, gel outside, medium in the middle
- Riders are always looking for solutions of SOFT GRIPS that don't slip on the bar. The rule in grip design is that the softer the material the more the grip will slip against the bar. ProGrip decided to design an even stronger inner sleeve to help minimize grip movement. And so, the first TRIPLE DENSITY GRIP was born.

- **THROTTLE GRIP** is molded directly on patented throttle tube profile

- **LEFT GRIP** No need for safety wire or Grip Glue with Pyton Gripping system with Steel Lock-Tight Band built-in Steel "Safety Band" Lock System. 100% NO SLIP GRIP!!

FMF GRIPS

FMF MX Velocity Grips

The Velocity grip's half waffle area has a base of firm high tack rubber compound. Built into the grip in the palm area is a soft gel anti-vibration palm pad. Diamond shaped knurling covers the non-waffled area of the Velocity grip to improve grip to glove traction and relaxes the riders grip for less arm pump. Also available in a medium (grey) compound.

FMF GRIPS

FMF Velocity ATV Grips

709-6007

The Velocity grip's half waffle area has a base of firm high tack rubber compound. Built into the flangeless grip is a soft gel anti-vibration palm pad. Diamond shaped knurling covers the non-waffled area of the Velocity grip to improve grip to glove traction and relaxes the riders grip for less arm pump. Can be used on personal water craft and mountain bikes

FMF 909 Ergo Grips

The 909 Ergo grips are specifically designed to contour with the natural shape of your hand. The 909 Ergo grip is a half waffle design, available in single or dual compound rubber. The single compound grip is made of a very soft, but high wear black rubber. It's compliant on the hands yet firm enough to last.

Black Grey	Blue/Black	Yellow/Red
709-6000	709-6003	709-6006

FMF Full Waffle Grips

709-6017

This grip mirrors the fit and feel of the Force grips, but doesn't have the stainless end cap. Sized around the popular Honda full waffle.

- Grey

GALINDO GRIPS

- Cruiser grips made from Galindo Kraton-G material.

HOT GRIPS®

Hidden Wire Hot Grips

No more wire running down the handle bars to get hooked and broken. The electrical wire for the grips is hidden inside the grip and is designed to feed through the center of the handlebars where it is protected. These grips are O.E.M. replacements on Arctic Cat and Ski-Doo brands.

SPI Heated Grip Econo 709-025

- Length - 130 mm
- Size - 7/8" + 7/8"
- Completely assembled wiring harness for easy installation and Hi-Lo Handlebar mounted switch

Replacement Switch Assembly 709-0251

HEATERS

Poly Grip Heater 710-4166

- Heat cartridges can be installed on most snowmobiles in minutes.
- "Poly Heater" features long life with an on/off switch.
- For satisfactory performance the lighting coil should be at least 75 watts.

710-6001

Hi/Low poly Heater 710-4167

Electric Thumb Warmer

- Adds enjoyment and comfort for the snowmobiler.
- Protects the thumb against freezing.
- Easy to install.

710-6101

HEATERS

Under Grip Heater

710-4170

- Adhesive, fits between the handlebar and grip.
- This kit comes with two heating elements that wrap around the handlebar, then your grip is placed over the elements.
- A High-Low-Off switch is included.
